

MAP AND DIRECTIONS TO DG-64

Directions to **DG-64** : Head South from the Reitz Union to Shands Hospital down Center Drive. After crossing Mowry Road, you will see a parking garage on your right (to the West) and a walk-in entrance area to Shands Hospital on your left (to the East). Head to the walk-in entrance area for the hospital, but take the left sidewalk off that entrance area which is beside a loading bay area and leads down a set of stairs. You should NOT go into the hospital. After going down the stairs, you will see a set of glass doors directly in front of you and a set of glass doors to your right. Enter the glass doors to your right into the Dental Building of the Health Science Center. The hallway from these glass doors will turn to the left. Continue following that hallway down until you see a door with a poster board beside it labeled "Center for Pain Research and Behavioral Health" - DG-64 (Dental building Ground floor). Walk right into the lab for the study; you don't need to knock on the door.

Makes sure you bring the lab phone number (265-0680 ext 44649) so that you can call for additional directions as needed.
